 H Hannah Macintyre 00:02

Hello, and welcome to mediumship matters with me Hannah McIntyre. And today we have another very exciting, great guest for you. It's Myra from star seed a Kashia. Hi, Myra, thank you for joining us.

 M Myra Antonia 00:17

Thank you very much for having me.

 H Hannah Macintyre 00:20

I'm really, really excited to talk to you because I've been watching your reels and your posts on Instagram. And I've seen all your kind of crazy, but really cool stuff that you do. And I cannot wait to find out more about it. Now I picked I went through your recent Eventbrite and I was looking at your jobs, your CV of experiences, and I picked some of my favourites. So myRA is extra dimensional Channeler, a star seed shaman and a light code carrier just to name a few of the many things that you do. So can you just tell us what you do?

 01:01

Well, what don't we do? So currently, it seems to be that my specialities are because it's always changing, you know, a long time. So currently, what I'm enjoying is the spoken light language codes and healing that comes through the voice. And that's relatively new for me on the path. Ah, I always saw the symbols in light when I was drawing them the hands always going, but the verbal stuff only in 2019. So it's collapsed. I really my instagram at found when I really started using it, which was during the lockdown. And that's when there was no stopping the light language. So I just thought, right, I'm gonna have to share it. And because when it first started, I was horrified. So anyway, so it's been my Instagram has been my kind of healing journey, arriving really back at my fullest expression of pure self that I can muster. Which hasn't always

been easy along the road, you know, it's not an easy road, necessarily the mastery that we come to achieve here on Earth, so bear with me, I'm enjoying more group stuff than I've ever done before.

02:36

Yeah, cuz you just did one last night, didn't you? Yeah, yeah,

02:40

really lovely group last night was really powerful really went over time. But everyone was just holding this immense space. And it was really quite a massive, Pivotal healing that we did, which I can go into it. Well, we think we were removed in some sense seals and distortions and frequency fences. From our system that we adopt, just from being born on earth, because we have the same energetic grid system as Earth, we are have. And so we inherit these seals which mess up our natural geometry and our circuitry, so that it makes it really hard. Unless Unless you're lucky or not so lucky, depending on which way you look at it, to not really have a veil. But it makes it really hard for people to raise their consciousness or these, these seals make it harder for us to raise our consciousness and this up into the heart chakra and therefore illuminating the upper chakras and you know, accessing full connection to our highest self and and what they do is they stop us receiving this stuff as receiving cosmic life force, life force from us. They reverse our DNA. So our cells start committing suicide and eventually we die because it's my belief. No one has to believe a word I say. This is this is my timeline and my story. Yeah. You know, it's been long. Currently, I believe that these vehicles these vessels, that house our soul, you know, the avatar for our consciousness to experience life to collect data for source so source can go Alright, yeah, I see that from that perspective. Interesting. No more than that. We make it so. So deep. This is a game. Yeah. So off on a tangent.

04:58

I love it that I'll get to let you keep going because I'm fascinated.

05:04

Anyway, it's my belief that these vehicles are meant to take us right the way through our evolution of consciousness, blacks that our particular soul, when it's incarnating, into the physical, chooses this vessel, which is one of the most sophisticated, humanoid in the this time matrix in this universe, yeah, we're relatively new. So we are just like, you know, a supersonic. And so our original blueprint would be to have these minimum 12 strands of DNA. At the moment, we've got two, three at most, and then the rest is this junk DNA, which has been online for many, many people. So the DNA is code. And when I say I'm a code, Keeper, and also code, destroyer wiper, and creator, with people for myself, and teach people how to do that for themselves, because we are the masters of our experience. Yeah, no, but there have been these these these things, these implants within us, that make us believe that we're not somehow that we're that we're separate from our source anyway. So you

06:29

believe that's been done to us and not been chosen by ourselves for this experience? Right? Both? Both. Okay. Interesting. Because,

06:39

because one of the primary distortions of this Time Matrix is freewill. Yeah, we believe we have this free will and to a certain extent we do however, every one thing, conscious being will be going back to source at some point, whether that's by conscious choosing to go back home or wherever, you know, you're gonna have to sit on the naughty step and be cosmic dust for a few billion trillion gazillion years. Eventually, you're gonna be you know, because you can only ascend so far, you know, on a surface to self pathway, you know, right. So, I believe, through through much personal experience. Yeah. And because my, let me just start by saying for many years of my awakening, I was not allowed or not permitted any external input, you know, I was not allowed to read books or watch videos, or do they would literally cut my eyes with a cosmic Vaseline. So I couldn't see. And I was only allowed to learn through direct communication with my higher self. And so I was just learning on a very intuitive very irrational way. You know, I could sit tell you, I don't know what it is. But the universe just looks like a load of doughnuts. You know, because I would see the toroids but didn't know they were tourists. So that's what says wisdom, first knowledge second. So a lot of this stuff that's come to me now as knowledge. So I've been able to, something gets presented to me, and I'm like, Oh, my goodness, that I've seen that I've experienced that. And oh, yeah, that makes sense of this. So it's been that way round for me. So through lots of personal experience and much weirdness that really made me think I was going completely bonkers.

08:38

Oh, yeah, I can imagine.

08:41

Because when when you start having extra dimensional communications, you know, you think you're going absolutely bananas. And, and, but then also reading stuff that just even if I don't understand the language of it on a conscious level, my DNA, it strikes chord, so I'm not saying my story, or my beliefs or Blogger is the only timeline because it's not this is a quantum field. Everything exists. Yeah. Wherever you are looking. That's your timeline. But somewhere on my timeline, I chose to have my DNA compromised, ultimately, for the purpose of my growth. Yeah, it was just for the purpose of my growth. No bad feelings. Yeah. Like dark. We've all been it. Yeah. We all are it. You know, we're, life is a whatever stage you know, we're all just players, ultimately playing a celestial game. We take it very personally. You see it so much in the woke, Awake, awake people, you know, not necessarily for still casting separation, because we believe this and someone else believe doesn't matter what we believe that's all information between information and our beliefs and opinions and What we do and which form we identify with, there's just a sea of love. Just so we can just meet each other there. I love it.

10:10

Oh my god, right? Where do I want to go with this? How did you start with just born? On this vibration? Did you have an awakening? Like? Both? Okay, because

10:25

when you're born I was born in 1973 with no, no real veil, you know, as far as I could see, I was talking to fairies and animals, and we'll see here in angels, and that was just life, you know, and it's not like, you know, you get to the age of 10 and suddenly go, Oh, my goodness, I'm breathing, are you breathing? You know, it was just, it's a natural function for us. And we shouldn't have this veil, these veils that there's not even a veil, you know, these fences that stop that make our cut, literally make our conscious consciousness, lower chakra, which we can talk about another time. So really, by the age of four, if there was some weird stuff going on for me. Wow. And

11:14

were your parents equipped to deal with that?

11:18

I mean, my parents were born in like, the 40s. You know, so they were as, I mean, they were as equipped as they could possibly be. My mom is a yoga teacher. So I plan really well, my parents were always really liberal and really loved music. And actually, I didn't come here as a, as a healer, because for me, everyone's a healer. Yes, I'm here as a co carrier. We're all this, you know, that's not the thing. I came here to make music. And, and create art. And, you know, make sure I want to make films that are that are that are spreading the word, but also with that sort of light hearted comedic element, but just beautifully, you know, I want to travel and that's what I want to do. It wasn't something I ever saw after it just was happening. It was just a, you know, an activation, which is what is meant to happen for us. So these 12 strands of DNA, a woman's activate in increments, and between the ages of zero and 12 and deliver until we're 44. And when we're fully activated, so we can you know, embody, you know, whatever it is our avatar, Christos self, the highest aspect. And so this was just happening in increments. And then, when I was 21, then I became sort of consciously aware that I was doing something different to most people. I was perceiving in a way that was different than most people and the channel that was coming out of my hands was intense. It sort of started then, but it wasn't till 10 years after that. So when I was 31, that I really needed my own salvation because I'd gotten really enmeshed in the 3d. And I was suicidal. Again, I had, you know, a drugs habit to young children. Life was very, you know, sex, drugs and rock and roll, and very object referral. So I was placing my happiness on stuff and things outside of myself and I was running programmes that, you know, money is the most important thing, for example, I was, you know, there was a lot going on, that forced me into an awakening of sorts. So,

13:57

do you feel like you your human chose to run that programme? Do you think your soul wanted

do you feel like you, your human chose to run that programme? Do you think your soul wanted you to run that programme? So you could experience the growth through it? How much do you feel was spirit and how much was your ego? And where does that line?

 14:13

Oh, no, because my ego is fought it the whole way. My egos only surrendered in the last few years. Really, it has really fought and been really cynical, but it's really pushed my soul forward. You know, yeah, we've been working together, you know, your ego can become your absolute ally. And I've 50 Next month, I've done a lot of work by now. You know, I've I've really went into shadow aspects to see what was there to collapse what was mine, what I had bought in from other timelines, what had been passed down to me through ancestral, you know, lineage, what have come through my soul was conscious, you know, so I've really been there and I really have and unlimited Are you people, if you're new on your journey, it's worth it. And also now, because there's so much more light available to us on Earth, it's so much more palatable and safer for us to be really standing in our light. Because, you know, it wasn't for many years, there was, there was a lot of darkness on the planet. You know, it wasn't that long ago to people getting put in mental asylums if they were single mother, you know, we've come a long way. And we need to go very far. And that's why it's happening so quickly. Now for people because there was so much activated DNA on the planet, the planet, the planet is activated, which is further activating us, we've got all these higher light codes, which are original keys and codes of creation. Because you know, within the organic universe, there are also parts that are not so organic, there are a bit more AI and you can see this kind of a rising AI could be very, very useful. But any power. Yeah. Any power in the right hands is a beautiful thing. Any power in the hands, who genuinely loves their brothers and sisters and all of humanity and Mother Earth is a beautiful thing. In the wrong hands. It can go a bit, you know, pear shaped, but anyway. So sorry, I believe that my soul has been here before this time has already happened. Yeah, you know, this is what we get a lot of what's it called deja vu. That's because we've already done this this weekend. It's a game. It's a bit like cosmic Rubik's Cube. Love. But people can just relax. Like right now, I just want to just say, because we can get too much in meshed in information, you know. And this game is about frequency and it's about unity. And how we really get to unity is by going in and developing a real intimate relationship with self come very self aware. So we can change this planet one at a time. You know, we really can if we learn to really love ourselves, like anyone that is in love, in the energy of love within themselves, will cause no harm. Yeah. Yeah. And so we need to just relax and know that it's time has already passed. Everything is okay. What is happening is we are cooling on it as it's happening for us for our awakening, you know, and if you can see it on the outside, go in this is our matrix, we are a matrix, we are a consciousness that creates the reality that we perceive. So yeah,

 18:05

so going back to what you were talking about at the very beginning with seals and all of that stuff. Yeah. Did Spirit put the seals here for our experience? Did somebody some other energy but the seals,

 18:20

... something about it, but it's both a human experience, it's both a gift and a challenge. It's a gift because it's a

everything spirit, but it isn't always necessarily light and fluffy? Is it? No? Black? Can we know when someone says spiritual? Can you define that please? Are you satanic, for example? And we can't you know, there have been spiritual wars going on in cosmos for aeons. I'm no galactic historian. That's not how the Akasha works. For me personally. There are people that are amazing galactic historians. That's not me, I access the Akasha in other ways. I do however, have had recall from other timelines, you know, and a lot when when I was really in the astral vision, I was I was really warring for my consciousness. I really was and but now that stopped, and I can choose to astral travel, if I want to, which I would usually do in the day. At nighttime. I sleep I rest. Yeah. Usually, well, that says been doing some good training recently. It's not the same. It's not the same. It's not the same as you can get trapped in this information. So we're sorry, what was the

 19:46

I can't remember now we're I don't know. We're just floating on anything. You asked me did I think

 19:50

someone has played Yeah, like Yes. So I think the planet was colonised right. Bye bye. Not so good. Right and you know, not all Reptilians are evil, that's just not a thing. Not all everything is everything the same you know? But I do feel that there was and if you I mean, in all ancient texts if you really start to investigate this, then you will start to have awakenings within your DNA because there's so much here you know, like I look at the news very rarely I have to say but I did wonder why aren't they reporting the huge pyramids under the water you know in what's his face? I can't remember now but you know off the coast of be naked I mean there's there's so much stuff that isn't isn't hot. Yeah, but so yeah, so at some point we may have got caught into this reincarnation trap where our energy is being harvested you know, we our emotions get spiked all the time. This creates it generates fear. Fear is then used as a source of fuel for these beings. So the answer is don't be in fear. It's not it's not real first thought and you'll only someone's energetic lunch when you're in a place of love you're no use and the frequency they just won't be able to exist here. So but this this is already this is this has already been played out you know, this is the kind of the rinse the transition the movement into a new nice new phase. So yeah. So

 21:42

the light language that you speak, channelled in the moment. Do you have like a dictionary of light language that you lean upon? Or is it always fresh?

 21:56

No, so sorry, because as soon as you say that the light language wants to start speaking

 22:01

well, I was going to ask you if you do ask them because

 22:05

honestly when I start to try and repress is literally sort of be sick and I get palpitations that might start just coming out now so people just bear with me because

 22:14

I'm feel it. This is a

 22:17

gear shift going on in my head.

 22:19

Well, I can when you're doing it even when I'm watching an old reel that I've watched four times if yours I can feel the energy of it. So it's fascinating

 22:29

that I went so so when it started because years and years and years ago, I'd heard light language and I thought Who is this idiot I'm not gonna lie for news. What am I just I really hated it. And so someone had said to me when I was doing a group workshop to get and when we could still do it together. I know we can do it together now but before thing it Yeah. And she said you were speaking another language. I know it wasn't speaking English, which is I know you will definitely speak in anyway. So then one day, all my major activations and girl activations have happened in the boss, I was in the bath and and I was, I don't know I was chatting away to myself aloud. And then suddenly it just started happening and I I remember putting my hands over my mouth and just looking around going because when I judged this guy back in the day guys were like my rap simmer down you know what's gonna happen don't

 23:36

there's nothing they like more than

 23:40

it really won't. They won't. And then anyway, years later cut two years later, I'm in the bath horrified. And the more I tried to stop it the more I just wanted to be sick. And I just then it just came and I have to say it was kind of orgasmic it was just like this amazing feeling I didn't know

what it I just felt so familiar. I don't know. It was amazing. And then I was getting the kind of theme so when it when it's come in, I get the same you know visual and I'm kind of hearing it being translated. I get the same sort of visual and feeling as I would if I was speaking English you know English is like or whatever language we speak you know, it's something that we've collectively agreed upon to indicate form you know, but yet within you know, so cat to me means one thing but to you it might mean another you know what I mean? So within that there is the subjective interpretation so when our ego our Earth self like big up the ego by the way like I'm not an ego Slayer I'm I'm an ego Have a love interest? Yeah. So so our Earth, self persona, whatever we want to call it wants to communicate through this instrument. It uses these particular words and phrases that we understand on a cognitive level, intellectual level get it emotionally might be, you know, whatever. But so, when the light language started, I just thought, you know what, because I'm such a competitive self berating, you know, yeah, Mother lover, I'm not going to watch anyone else's expression. I'm just not going to even I'm just going to mine to develop whatever my unique thing is, that's what's gonna thing. And so that's what I did. And I just had to immediately get it out on my Instagram, because there was no like cosmic to it. There was no stopping it. And yeah, so yes, I was just that, that you can, if you go back to the beginning can see my face. Really quiet and tentative. And, you know, it's been a journey. So at no point do I sit there going, right? Today I'm channelling whatever, yeah, Arcturians or Bob Marley. I'm not doing that I don't. For me, I'm connecting him with my highest self. And as high up to the source of my creation as I can, but along my life, and I kind of, because for me, when I'm, if I'm challenging, it's like, something's moved into my vehicle, and I don't like it. It violates my space. So I don't mind getting like an electronic download. So like, information sort of drops in like coins, I suppose. But it's not like moving through me in a sense. So I connect to my higher self. And sometimes I might connect him with archetypes. And sometimes I might connecting with Angelics. You know, have the blu ray have the highest line results, but I will never name or, you know, yeah, because there's a lot of infiltration and I like to be very, very safe because I really got attacked heavily when Michael activations started, but that isn't probably a whole nother Wow, thing. So, so yeah, so essentially, if my, the sounds my highest self makes when it moves through my instrument, and between that I can interchange between English and the sound, the resonance and the frequency of the sounds that come through the destroyed chakra and of the mouse, you know. And so really, the hands you know, this physical emanation of our hearts zero point and then the throat is outlet you know, the sound outlet and, and tool of our creation, no sound creates matter. So, the way the healing works, it works like sound balls would work or tuning forks would work. Everything is sound universe means universal song, you know, we're all part of this, you know, symphony, this harmony. And the sounds, which are an extension of the healing are there to help harmonise and shift your frequency geometries, with whatever distortions run in you know that they get purified and harmonise via this this vehicle?

H

Hannah Macintyre 29:11

So distortions? Obviously, you said some we pick up from being on the earth grid from birth and things like that. Can distortions happened through Can we just do it ourselves? Can other people distort us?

29:24

Yeah. Yeah. And to a certain degree, no one can affect our frequency unless we allow it for Yeah. You know, we, we, you know, even if we've been allowing it for 6000 years, whilst we've

been in this recycle bin, our diet, I've gone to the light or get pushed right back in order for a second view, and I get no time to process shit. So I'll take it all in with my energy grid and start reliving the same thing over and over again. Even if we've been doing that for six years, and you're in this moment, we can go you know what, I do not consent. I get off that wheel. I'm going to start to Do what I'm meant to be doing naturally, and descends organically. I can make that choice right now. And left that

30:10

is fascinating to me. Now I've got it, I've got to delve into attack. Yeah. What, who, when, why? How

30:20

will anything that's trying to stop you ascending up through your dimension so that you can activate the living crap out yourself and be who you came to be? And be of no use to their power source. Right? You know, and I don't want to like, see the fingers, you know, like for short time, I got after, after when when I was permitted, suddenly, I was permitted to take information in from the outside in 2018, after 12 years of nothing, but no, no thing. And so, I asked, right, okay, this must be, you know, the girl activations are starting, what is it that I need to learn? I asked my hires for guidance, and they said, why? Well, you got to learn ancient history, you got to learn galactic history, you got to learn quantum physics, and you got to learn sacred geometry. And I was like, brilliant. Why can't it be creative jewellery making? Yeah, yeah. So you know, there are five went squarely onto like the search engines now. I'm gonna just drop it now that if it's mainstream, is probably inverted somehow. You know, and I noticed that just a tough pill to swallow, but please just swallow it down over loads of lemonade. Just know that it's okay. Because we're here for a frequency. We're not here for the knowledge. And even if you have to unlearn a load of stuff that you've thought was true, it's okay. And the reason you're having to do those because your consciousness is expanding. When your consciousness expands, there's new ceilings to your potential of, of knowledge and wisdom. Okay, because there's always more and like I say, from these coordinates where I am right now, I believe X, Y and Z. I might believe something completely different next year.

32:08

I love that you say that because I'm always saying that on the podcast, I can only say what I've got right now. You might change. Yeah, like what

32:14

I believed a few years ago was something very different. So I've had to pass through New Age stuff for a short time. Yeah, that is when I got the most heavy attack because suddenly after years of my whole life of not ever needing to name my guides or see them or didn't know them on a form level. I felt them I could hear them. They were showing me pictures. They were telling me stuff about people how would I even know that stuff? You know, it was cushty And suddenly, I had beings coming to me telling me this is how it is and ditatoo We are listening to

each channel we have been here on this occasion but meanwhile having my ordinary guidance intuitions, but also having this new stuff which was really quiet you know, I remember getting woken up by being in the middle of the night and it was after a relentless it was relentless. It was 24/7 the night times were worse like because they were taking me on these like epic it was like some kind of epic movie every single night. Like you know what this I don't know what was going on but and that lasted not for very long because it just felt fishy. It felt fishy and then before long I started I so I could never remember any of the sacred geometry that I was trying to learn. I couldn't remember this and I couldn't remember that and it just wasn't going in and then I happened upon some information which I really wanted to reject at first because I had kind of created a bit of an identity around what had been you know because it was really strong and powerful and these were Ascended Masters and they were archangels and it was all like seemingly like wow this is happening now Whoo. But what it was was it was an entrapment to take me away from my spiritual autonomy neither guru we don't need you know, we don't need it we need our heart we need our highest needs a connection with God goddess was creation you know? And yes, nice to hang out and feel supported. But ultimately everything is one. Yeah. You are eyes you you know, this is it ultimately. Anyway, so I really it was a real test. And it was very tiring. But it was a test of my discernment of not just like believing in stuff just because that was the first thing I saw on it. Really learning to go in again, to not need all of that validation of this being or that being or, you know, to go in. And remember, I am the one that I've been waiting for, you know, and so, attack still kind of go on. And oftentimes, it's via loved ones, via, you know, you can, you can, you can see, you can see it. And we have a saying in my house, because we're all very sensitive. My twin flame is herkie Empath and mazing healer, very fiery, my daughter is Goddess awakening. And I mean, her journey has been, she could write a book already, she's 23, you know, she's got this fire as well. And I've got two lots of fire in my first three signs in my chart. And so there are these opportunities where we say the jinns are in. You know, so when you know that there's a situation that's created where these lower entities can come in and create chaos. You know, they want to create drama, they want to create discord, they want to, you know, work through people. And, you know, when you're I mean, I've had training now that I know when the jinns are in, and I can hold my frequency back and see when they come in, and people haven't had that chance to hold frequency in either because they're compromised in one way they might be over tired or stressed or diddler. There's always some way in which we can allow these, this. But again, we can't have a possession or entity attachment or parasite, or a cord or a Dark Crystal or implant or a cone or a rod or a steel or a webinar or whatever, we might have energetic, disturbing somehow, unless on some level, we have agreed to it consciously or unconsciously on this timeline or another timeline. There's always been an agreement. And sometimes these are just ingrained memory in the cellular memory. You know, that's why it's good. It's important to clear cellular memory.

H

Hannah Macintyre 37:49

Interesting. This is really interesting. I've had an email from somebody talking about dark forces and stuff like that. And they were saying they do exist, but if you don't believe they exist, they can't exist for you. Because you're creating your is that sort of tying in with what you mean, if you if you are just vibrating out of it. Can they get

38:09

you yet? No.

38:13

Fascinating? Well, I mean,

38:14

no, well, no, because the only so these these beings are no longer connected. And the thing is, like no judgement, because I shouldn't be kudos because anyone that's actually gone that far that actually ascended into higher dimensions of consciousness. On a negative pathway, that takes a lot of work. Yeah, hard graft, right? Because love is so enticing. You know, when we, you know, it's just yummy. And so to be able to resist that to be able to shut down the emotional body. And then, you know, we have to think that these people may have been infiltrated as well, like, at some point. So deep healing and ultimately, its darkness only exists because source created it. Yeah. Matter can only exist because darkness exists without darkness. Nothing matters. There is no matter for us to experience what appears to be solid and separate. This is an illusion, this is a VR, right? So really, my thing is, okay, if this is an observable, observable Universe, and Everything exists in a quantum field, I'm just going to focus on what it is I want to see. Yeah. And that's it and it doesn't matter in the information. We're human. We love drama. I love to you know, once in a while dip my toe in and have a little look whether that's like the mainstream news, the alternative news, you know, the whatever cuz it, whatever, you know, you know what I'm talking about information. And even everything that I said today, it's just information based on one individuated lens of perception. You know, and it might, it might excite you in some way you might be sitting thinking is this idiot, and it's all good, because it all makes the world go round. So but yeah, I mean, darkness exists within everything within us. You know, if we always like, only looking for the light in a certain way, then we're rejecting the darkness. But if we just accepted our darkness, the darkness and didn't have anything about it, we were quite neutral about it. And, but it still, maybe we loved it, because we could see that, you know, maybe things like I'm talking about within us like shadow aspects. The things that we want to reject most about us the things that we are just so ashamed of, to see that we constantly want to just call out in other people, those things need the most attention and love, because they were only created from shame and, you know, fear and judgement and separation and illusion. So really, what they need is the antithesis of this so so the darkness, what's not created in the darkness? Yeah.

41:32

The journey is all about facing it, isn't it?

41:34

I love it, not necessarily stain it because not to get into

41:39

your present. No question about it. Yeah.

 41:42

But you know, to go there, because if you go there with an intention, well, I'm gonna go into my own personal save hell, garden of hell, whatever it might be, it's you go, I'm gonna go in there and find out where is the seed points of this thing that keeps on factoring out as a captain in my life over and I need to get to the sea point. So I can be the one that changes that variable. And it only wants to be seen. So nowadays, I mean, I can rebirth in a matter of a couple of hours. When something hits, you know, and I can go in, I'll go right let me go to that source. Trauma, pain, whatever, going, you know, extrapolate that wisdom, so I can release the perceived pain send all that data back to source so that I can just retain that wisdom so I can take that forward with me in life and then we just start to integrate, integrate, integrate, and then the you know, the light and the dark is just the oneness within us. And so if you're really seeing the darkness the darkness on the outside you need to look at that darkness and darkness on the inside. Is what I'm saying.

 42:52

I love it. So would you mind challenging a little bit? Of course not for us if you wouldn't mind if that's not putting you in an awkward position.

 43:01

It's never it's never an awkward position. And so I think given what we've just talked about, I really believe that we self actualize, we self activates we, you know, we awaken at the perfect moments in the perfect way. And sorry, dogs.

 43:29

raincoats

 43:31

don't know what they are. But yeah, so I just want to give people that self empowerment and they actually talking to me about giving people dragon empowerment. And so we dragons really, and interesting because, you know, the reptilians are descendants of dragons, you know, so here they're presenting with dragons that are here for our greatest good for healing, very intuitive, very powerful beings that can really collapse stuff on a on a soul level. So stuff that might have taken us lifetimes to work through. So we continue to reawaken because all of our information is there in our cache or waiting to just drop down a little gems into our DNA and reawakened to activate now so can have a little dragon empowerment so that we can activate whatever is ready to come online now in this in this Now moment

 44:41
